The sun hasn't even risen yet!! This is way to early and inconsiderate for these loud announcements over the microphone for the residents in this community. 9-Mar	10:26 a.m.	Noise	Ewa Beach	Firing Range	(b) (6)	<p>Retrieved 9 Mar 20, 10:31 a.m. Complaint: Date Noise heard: 13 Jan 20. Time: 0538. PRTF is back online after installing "baffles" reportedly installed for noise abatement.</p> <p>As a community member accurately stated at the May, 2019, Ewa Neighborhood Board meeting, there was never any chance that putting baffles on the sides of the berms would have any effect on the sound waves from the PA system that problematically travel long distances into the Ewa community, especially in the pre-dawn hours when sound wave refraction due to terrestrial cooling occurs.</p> <p>https://www.britannica.com/science/sound-physics/Refraction</p> <p>Whichever entity sold MCBH on the idea that baffles on the berms would have any effect on sound propagation into the adjacent neighborhood, especially to the west, should be charged with fraud.</p> <p>Questions posed, but as yet remain unanswered:</p> <p>By what metric was it determined that these baffles would decrease sound levels in the surrounding community?</p> <p>By what metric would MCBH be able to determine effectiveness of this investment?</p> <p>How much did we taxpayers spend for this useless project?</p>	

						<p>Retrieved 9 Mar 20, 11:53 a.m. from KBAZ_COMREL@usmc.mil. Noise Heard: 14 Jan 20; Time: 0641. Complaint: Detailed Comments Finished by mid-day.</p> <p>The claim made by (b) (6) that the PA system must be used prior to 0700 because otherwise they would have to go into the evening is rather insulting to our intelligence.</p> <p>First, go ahead and go into the evening if waiting until 0700 to destroy the peace and quiet would cause such a pushback. Second, Doesn't the Range Safety Officer have maximum duty limits? 10 hours per MCO 3550.10? Regardless of the letter of the actual regs, it's never a good idea to have your safety guy in a state of fatigue, which, if he's powering up the PA system and testing it at 0545, what time did he get up?</p> <p>It's time to recognize that the real encroachment lies in PRTF's fairly recent decision to unnecessarily operate their PA system commencing during nighttime civil quiet hours.</p>

This particular announcer ALWAYS is overly loud and annoying in his execution of his verbal commands. I have talked to multiple people who are there to train and they all agree that he is "a little too much". He obviously loves to hear himself over the loud PA System. Please ask him to refrain from the unnecessary "sing song" way of announcing. It;s totally above and beyond his duty.

14-Sep-20	6:40 a.m.	Noise	Ewa	Firing Range	No Name/No Phone	Retrieved 15 Sep 20, 6:25 a.m. from KBAZ_COMREL@usmc.mil. Complaint: Announcer at Firing Range started with loud and over the top announcing on the microphone. This is incredibly early to start yelling through a microphone in a residential area such as Ewa. The gunfire commences at 7am. It is the announcer that is more annoying than the sound of gunfire. We accept the noise of the firing but the guy needs to be evaluated and he needs to control his unprofessional conduct.
